## SCA Export Policy

The Strategic Goods (Control) Act or SGCA, regulates the trade in strategic goods and strategic goods technology. Strategic goods refer to items and their related technology that can be used to produce weapons of mass destruction, and missiles capable of delivering such weapons. This includes arms and military equipment, and commercial items that can be used to develop weapons of mass destruction. The list of controlled goods are divided into: military goods and dual-use goods. The dual-use list is similar in structure to the U.S. Commerce Control List and follows the European Union's general numbering system. Though all SHI PTC products are not classified as a military or dual-use list, SCA in complying with SHI's export control policy, when shipping out direct from Japan. SCA would therefore require the submission of End User information for every order, at the point of order entry.
